## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-26 and 29-32, drawn to a method of treating chronic pain by employing compounds with formula I, wherein Z is formula (iv).

Group II, claim(s) 1-32, drawn to a method of treating chronic pain by employing compounds with formula I, wherein Z is formula (v).

Group III, claim(s) 1-26 and 29-32, drawn to a method of treating chronic pain by employing compounds with formula I, wherein Z is formula (vi).

Group IV, claim(s) 1-26 and 29-32, drawn to a method of treating chronic pain by employing compounds with formula I, wherein Z is formula (vii).

Group V claim(s) 1-26 and 29-32, drawn to a method of treating chronic pain by employing compounds with formula I, wherein Z is formula (viii).

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions are directed to the employment of compounds with distinct structures and lack of a special technical feature. Thus, they do not represent a single general inventive concept.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Art Unit: 1617

- a) Compounds with various moieties as identified above employed in the method of treating chronic pain.
- b) conditions that are associated with the chronic pain.

Applicant is required, in reply to this action, to elect a single species (i.e., one single compound and one pain-associated medical conditions recited in the claims) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-32 are drawn to various structurally distinct compounds; they are also drawn to various pain associated conditions that are diverse and distinct.

The following claim(s) are generic: 1-32.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: compounds in each group represent a variety of structurally different compounds evidenced by the different substituents, region-isomers, etc.

Different conditions recited herein are known to have different pathophysiology, treatments, and symptoms. Thus, they are related to different fields of technology and fields of search.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to San-ming Hui whose telephone number is (703) 305-1002. The examiner can normally be reached on Mon 9:00 to 1:00, Tu - Fri from 9:00 to 6:00.
